

COVID-19 Financial Impact: Elective Surgery

Monitor the financial impact of cancelled elective surgical procedures

Type: Analytics Accelerator

ID: 3592

Revised: 2020-Apr-29

Understand the financial, provider, and patient impact of COVID-19-related declines in elective surgeries; prioritize surgeries based on provider and patient safety, financial impact, and provider availability to deliver the care patients need:

- Prioritize the surgery backlog (strategic and financial importance, procedure, location, etc.)
- Gain visibility into procedure trends by revenue, department, location, and more to help plan recovery
- Use scenario planning to assess capacity and financial impact

The Elective Surgeries application helps healthcare systems recover from the provider and patient toll and the revenue loss of COVID-19 surgery cancellations. At a glance, you can prioritize surgeries that will keep providers and patients safe and drive revenue. In-app tracking enables you to monitor your progress on the road to treating the backlog of patients and recovering lost revenue.
