

# DOS™ Real-Time Streaming

Receive and process HL7v2.x messages to support near real-time analytics

**Type:** Platform Add-on (additional cost)

**ID:** 2475

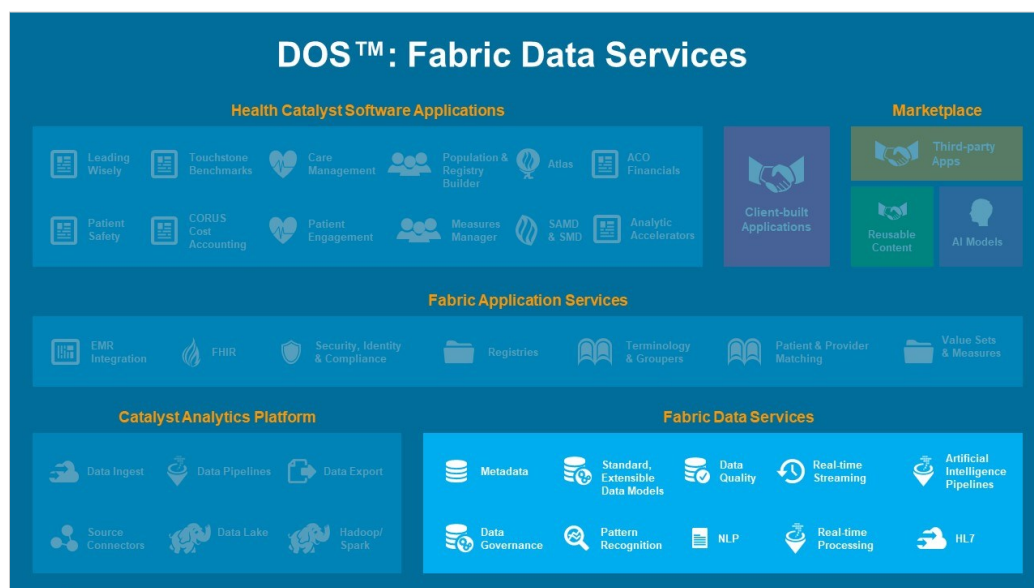

**Revised:** 2019-Dec-19

**DOS Fabric Web Services for Real-time Streaming** is a Health Catalyst web services application designed specifically for healthcare that enables DOS and Software Applications and Analytics Accelerators, to receive and process HL7 messages in real time. The HL7 organization is well known among healthcare organizations, vendors, and software products for its standards that enable integration between systems. DOS components take advantage of this service to create source marts that hold data received via HL7 messages.
