

Go-live and User Adoption Support

Daily Feedback, Q&A Sessions, and Reviews

Type: Professional Service

ID: 2911

Revised: 2018-11-15

Shortly after training, Health Catalyst will work closely with your organization's team to ensure successful go-live and user adoption. During on-site visits, training gaps are assessed and reinforced, as well as in-person shadowing of surveillance work. Health Catalyst experts will use best practices and client experience to offer refinement and fine tuning to your organization's patient safety surveillance work. Post-go-live, Health Catalyst will help your organization transition to a routine and on-going PSO services model. The Health Catalyst PSO creates a secure and safe environment where clients can collect and analyze patient safety events to learn and improve, free from fear of litigation.

Success stories
