

The New Healthcare.AI Optimization Services, Level 1

Transformative services that dramatically broaden the effective use and use cases for AI in your organization

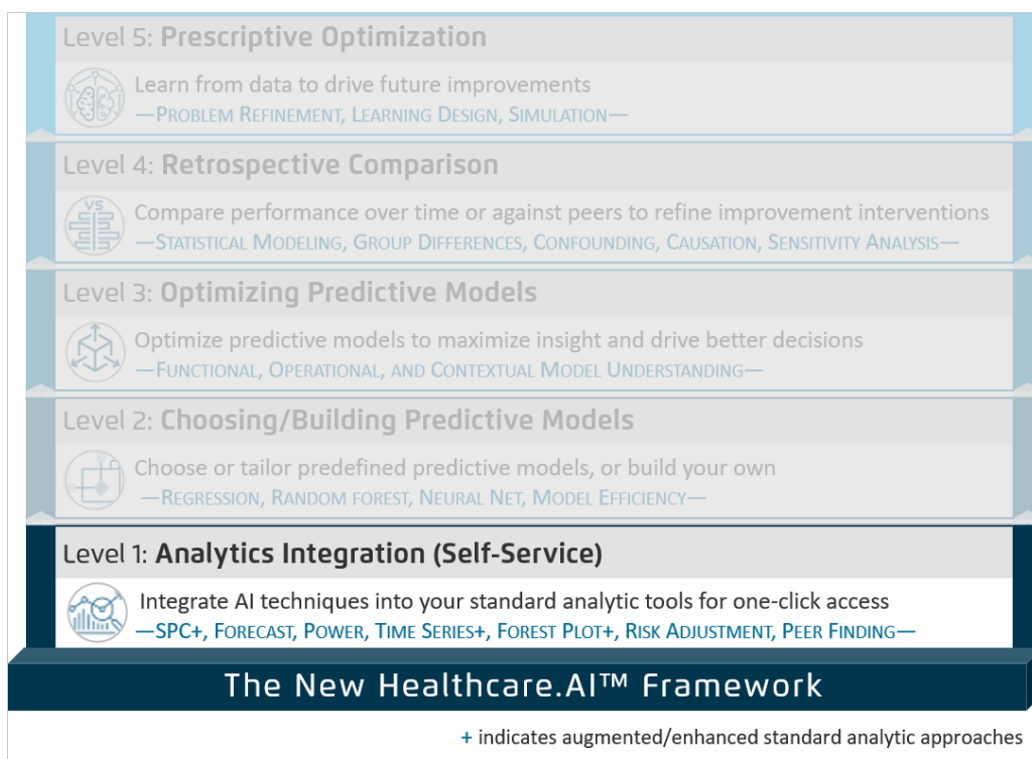

Type: Technology Services

ID: 3837

Revised: 2021-Feb-22

The new Healthcare.AI™ Optimization Services by Health Catalyst help healthcare systems expand the use of AI (augmented intelligence) across the organization. The team provides expert guidance to deliver AI in your BI (business intelligence) tools, train your team to use and interpret AI, and help your team understand AI methods to drive improvement.

Intended Users

- Chief information officers
- Chief medical information officers
- Chief analytics officers
- Analysts

The problem

Many healthcare organizations have begun to integrate AI tools or talent into their analytics but have been unable to demonstrate value from these efforts. Leaders and analysts struggle to integrate AI into BI tools and reports, or they misinterpret the analytics. This makes it difficult to know if AI is working or how to adjust to make it work better.

Our approach

Our Healthcare.AI Optimization Services help significantly expand the understanding and outcomes of AI in analytics—and improve your success rates—by providing expert data scientists to help you deliver AI in your BI tools and drive adoption through advanced domain training.

Benefits and features

- **Deliver effective AI right in your BI tools.** Within your existing BI tools or Health Catalyst analytics accelerators or products, our team will help you build AI-driven BI reports.
- **Drive adoption through expert training.** Our data scientists will train your team to use and interpret AI capabilities (e.g., what does it mean when a changepoint has been detected?) and on how the calculations work (e.g., how do different changepoint detection algorithms work?).

This document provides an overview of the technology that is offered by Health Catalyst. We are continuously improving our Technology and reserve the right to make changes in the features shown herein or to discontinue any technology at any time without notice or obligation. Some technology may not be available for deployment based on product status or because it was not included in your Order Forms.
