

# Care Management Solution

*Deliver real ROI for care management with a data- and analytics-driven suite of tools*

Type: Analytics Solution

ID: 3625

Revised: 2020-May-27

As healthcare systems intensify their pursuit of the Triple Aim, care management has emerged as a central strategy. Yet fragmented workflows, poor data access and quality, and limited transparency for program evaluation can complicate efforts. To improve health and cost outcomes, organizations need technology and processes that deliver visibility across the continuum for high- and rising-risk populations—and support a more streamlined and patient-centric care management.

## Applications within the solution

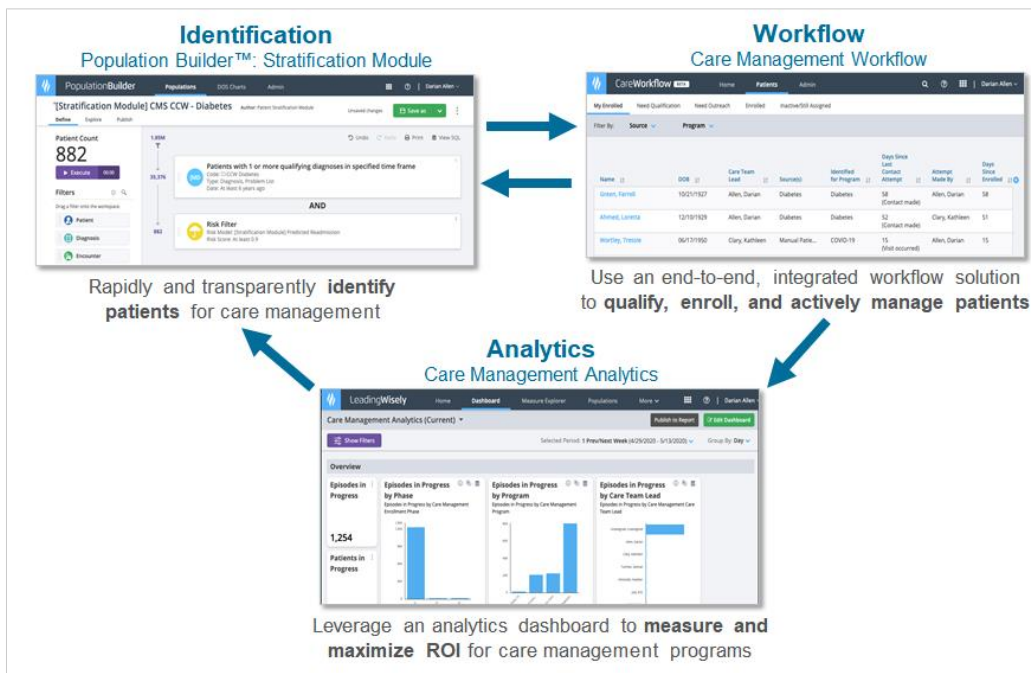

- Population Stratification
- Population Care Flow
- Population Care Insights

## Services within the solution

- Care Management Assessment
- Care Management Population Design
- Care Management Program Design
- Care Management Evaluation

## Success stories
